Art Unit: 1614

Claims 22-37 are presented for examination.

The response to the restriction requirement of February 20, 2004 has been received and entered.

Applicant elected group I, claims 22-37 for examination.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 22-37 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 10-15, 23-28 and 37-40 of copending Application No. 09/854,414. Although the conflicting claims are not identical, they are not patentably distinct from each other because they overlap. The claims of the copending application are drawn to the use of an alpha1 antagonist in combination with a compound for reducing redness, for modulating pupil dilation. The claims of the instant application are drawn to the specific alpha1 antagonists in combination with a compound for reducing redness for modulating pupil dilation. The claims of the copending application are the broader claims, which encompass the claims of the instant application.

Art Unit: 1614

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
